

Consulting Foresters

Consulting foresters offer fee-for-service forestry assistance to landowners. A forester can help you develop a forest management plan for your property that can assist you in meeting your desired goals for your land. These foresters usually have at least a 4-year degree, and many are registered with the State of Michigan. The Van Buren Conservation District encourages landowners to check credentials and references of consulting foresters.

To find additional forest resources please visit any of the following:
